Be an avant-gardener for the 21st Century!

***HERB AND VEGETABLE GARDENING* tells you everything you need to know to make self-sustainability a reality in your own backyard or balcony!**

There is nothing more satisfying than growing your own herbs and vegetables – planting the seed, tending the plants carefully, watching them thrive and finally being rewarded with a bumper harvest!

Herb & Vegetable Gardening: The Definitive Guide to Growing and Harvesting Herbs and Vegetables is an information-packed reference book for anyone wishing to grow their own edible garden, whether they have space only for a few pots on a balcony or a dedicated vegetable patch.

Imagine swathes of purple lavender that you can pick and dry for your own fragrant herb pillow; tasty basil that you can snip from the plant to pop into a glorious pesto; ripe and luscious tomatoes, with a deep, rich taste that you never thought possible; or crisp, crunchy lettuce for a refreshing salad on a summer's day.

This useful resource is elegantly designed and lavishly illustrated throughout with step-by-step, ID and landscape photographs. It also features a detailed plant directory.

Herb & Vegetable Gardening provides essential information about cultivating, propagating and designing your garden with a huge range of herbs and vegetables. There are hints and tips for maintaining your herb and vegetable garden as well as harvesting and storing your fresh produce.

There is also a selection of recipes plus some details on techniques for cooking with herbs and vegetables, and this book also examines a range of medicinal, cosmetic and household uses for herbs.

Reconnect with Mother Earth – grow your own herbs and vegetables!
