## Description

This unique, multilayered book recreates the mystery and magic of medieval gardens and provides the tools for designing these inspiring gardens for yourself. Each chapter features a garden design based on a theme of significance in the medieval world. Chapters begin with an engaging historical overview and a discussion of society, culture, religion and mythology in relation to each theme.

Each design is illustrated with original watercolours and they are all suitable for an average suburban garden plot. Each chapter explains how to create the particular garden design, includes a list of appropriate plantings and details the skills required with step-by-step instructions.

*In a Unicorn's Garden* features an illustrated medieval herbal, a resources section for finding suitable plants in Australia, the USA and Europe and a directory of international medieval gardens. The designs presented in this special book include a medieval cook's garden, a garden of eternal life and a paradise garden.

## Sales Points

- Judyth McLeod is a world renowned horticulturalist and garden historian
- Features beautiful original watercolour garden designs painted by the author
- The detailed and well-researched text is complemented by specially commissioned photography

## Author Profile

Dr Judyth McLeod has been a university lecturer in horticulture, landscape design, graphic art and sustainable architecture. She is the author of a number of books on gardening and natural methods of healthcare. Judyth is the co-owner of a nursery on the outskirts of Sydney, Honeysuckle Cottage, which specialises in pre-twentieth century plants.
